

Acerbis lever protectors

Acerbis lever guards are made of very strong nylon material.

Mount the lever guard as follows:

- Extend the mounting clip and attach it to the handlebars - see mounting

Mount the handlebar and attach the handlebar to the handlebar.

- Adjust the handles so that the screws can be attached, making sure that the handle throttle handle is not attached to the lever guard.

- Insert the washers and bolts into the lever guard.

- Insert the washer into the handlebar and attach the end of the lever guard to the clamps.

- Attach the washers, bolts, gasket and nut.

- Tighten the bolts after you have adjusted the protectors to the desired position.

- Also tighten the nut.

WARNING: The lever guards cannot prevent injury in the event of accident. They are designed to protect your hands from cold weather and the impact of small branches or stones. Do not ride with damaged hand guards. Failure to follow the above instructions may affect maneuverability the motorcycle, possibly resulting in an accident.
